Name : Laura

Surname : Centi

Status/position: Student

Professional address: Università di Ferrara, Dipartimento di Biologia ed Evoluzione, Sezione di Paleobiologia, Preistoria e Antropologia, Corso Ercole I d'Este 32, I-44100, Ferrara

Country: Italy

Phone number : 3477197774

e-mail: lauracenti@hotmail.it

Laura Centi is a student of the Ferrara University and she's currently attending the Matser in Quaternary, Prehistory and Archeology, double degree with the Polytechnic Institute of Tomar, Portugal.

She graduated in 2010, with the Ferrara University, in the study course of Technologies for Cultural Heritage, with a thesis entitled: "The last Levallois: techno-economy of the lithic production and spatial organization of the A5-A6 complex (44.000 cal. BP) of Fumane Cave (Verona). Study of two different kinds of flint.", where she analyzed two different typology of flint from the stratigraphic units A5 and A6 of Fumane Cave, with the technological and the tecno-economical study of the industry, the realization of the spatial distribution of the most relevant findings and the check of eventual refitting between the flakes.

She participated in different excavations, particularly at Fumane Cave since 2009, but also in others sites in Italy and abroad, from different periods, from the Lower Paleolithic to the Middle Ages.

KEY WORDS

PERIOD : Middle Paleolithic

GEOGRAPHY : Italy, North-eastern region

SPECIALITY : Study of the lithic assemblage

CULTURE/TECHNO-COMPLEX : Mousterian

RESEARCH TASK AT FUMANE

Study of the lithic assemblage of levels A5 and A6.
